

**Commonly: Knotted Poa**  
**Vascular Plant Family: Poaceae**  
Flowers late winter to summer

*Poa drummondiana* is a perennial grass to 80cm tall with 1-3 bulb-like swellings at the base. The leaf blades are up to 30cm long and 4mm wide, flat or folded.

The glumes supporting the spikelets are 3-5 nerved.

The inflorescence is loose with spreading branches. The spikelets are green often purple tinged as shown in the following photograph.

The ligule is thin up to 6mm long and jagged.
