

Poa poiformis

Commonly: Coastal Poa

Vascular Plant Family: Poaceae

Flowers spring and summer

Poa poiformis is a perennial grass to 90cm tall. The leaf blades are up to 45cm long and 1mm wide as they are usually inrolled to almost needle-like.

The inflorescence is narrow, the branches mostly erect and rarely spreading. The spikelets are green when young, compressed up to 1cm long,

The glumes are equal to subequal, 3-ribbed, up to 4mm long.
